RESEARCH EXPERIENCE

Astera Institute *Research Engineer, Robotics* 2025–present

Led development of Value-Guided Action Transport for offline reinforcement learning. Trained wrist-camera policies for peg insertion and a router for bimanual skills in simulation. Fine-tuned a grasp generator in simulation and integrated a separate pretrained detector into a physical picking system.

K-Scale Labs *Open-Source Robotics Researcher* 2024

Worked on humanoid locomotion and motion imitation. Built pose-transfer and teleoperation tools for collecting human-to-robot demonstrations.

University of California, San Diego *Graduate Research Assistant* 2022–2024

Built simulation environments and ran task-transfer and real-robot experiments for offline-to-online world models in Professor Xiaolong Wang's lab.

Cerenaut *Computer Vision Researcher* 2021–2022

Developed bilateral neural-network architectures and studied brain-inspired approaches to reinforcement learning.

PUBLICATIONS

Deep Learning in a Bilateral Brain with Hemispheric Specialisation 2025
First author · LOD 2024 proceedings, Springer LNCS

Finetuning Offline World Models in the Real World 2023
Coauthor · Conference on Robot Learning (CoRL), oral presentation

VisDA-2021 Competition: Universal Domain Adaptation to Improve Performance on Out-of-Distribution Data 2022
Coauthor · NeurIPS 2021 Competitions and Demonstrations Track, PMLR

EDUCATION AND TEACHING

University of California, San Diego *M.S., Intelligent Systems, Robotics and Control* 2024

Teaching Assistant, BIPN 164: Computational Models and Theories in Neuroscience (Spring 2023).

National Institute of Technology, Warangal 2019
B.Tech. in Electrical and Electronics Engineering

EARLIER EXPERIENCE

Machine Learning Engineer (Co-op), FrontiersMarket · Deep Learning Engineer, Streamingo Solutions · Computer Vision Data Scientist, Endovision AI · Student Researcher, IIT Bombay · Software Engineer, FactSet.
